<p>1. The first step in the process of the cell cycle is the replication of DNA. This process is called DNA replication and occurs during the S phase of the cell cycle. The DNA molecule is duplicated, resulting in two identical DNA molecules.</p>	<p>2. The second step in the process of the cell cycle is the separation of the two DNA molecules. This process is called mitosis and occurs during the M phase of the cell cycle. The two DNA molecules are separated and distributed to two daughter cells.</p>
